

#### WORKING PRINCIPLE

When the machine is pushed, either forward or reverse, the side wheel activates the main brush and, in addition, a drive shaft connected to the vacuum-fan which enables the suction of dust during the cleaning job.

The sweeper is equipped with a cartridge filter, which is made of polyester, to retain small particles of dust.

The filter is washable and can be easily removed for maintenance purpose or eventual replacement.

We have designed a manual sweeper integrated by a vacuum system completely free from batteries, engines or cables, to guarantee ease of use, value for money and respect for ecology.

Mach prides itself by manufacturing products with high standards of quality, robustness and versatility, and by selling and servicing them through a highly selected and qualified worldwide network of distributors.

### MACH ME

The MACH ME is a manual sweeper with a total sweeping path of 29 in.

It can sweep up to 23,573 ft<sup>2</sup>/h, and is therefore more than 10 times faster than a man with a broom.

It combines PRODUCTIVITY with VALUE FOR MONEY, and can be employed anywhere there are small to medium floor areas to be kept dust-free.

### MACH MEP

The MACH MEP is a very innovative manual sweeper, as it is equipped with a patented system that enables the complete control of dust, which would otherwise be raised when using any other traditional manual sweepers.

MACH MEP has an unlimited running time, it is completely silent and 100% ecological.
